M4: Schriftliche Version des Audio-Tracks

Listening: A school project

- Kelly: So tell me about your school project, Henry. You didn't use your smartphone for a week! Wow!
- Henry: At first I thought I couldn't do it for an *hour*! I almost went crazy, and I had to ask my mum to keep my phone for the week. I *really* missed texting and I imagined my friends were having fun without me. I felt very lonely and bored. But after two days, I was talking more to my mum and my brother. And I even liked it! I had to talk to my friends face-to-face. That was a rule. Without social media, we had a lot to talk about, so we were never bored. We didn't even need to watch TV. And I got 98 out of 100 for my Maths test because I had more time to study!
- Kelly: So have you decided to live without your smartphone now?
- Henry: You can't really, because this is how most people stay in touch. And I can't live without some apps! But I'm going to try not to use it so much!
